WATTS®

CONNECT. CONTROL. CONSERVE.℠

Data Centers Can't Afford Downtime

Optimize uptime and enhance operational efficiency with Watts solutions for data centers. From high-performing hydronic cooling components to reliable plumbing and flow control products, Watts provides mission-critical performance to keep your data center running efficiently.

Enhanced Protection
Continuously monitor your data center with smart & connected solutions to detect leaks and potential problems, send immediate notifications, and avoid downtime.

Energy Efficiency
Reduce energy and operating costs with energy-efficient and energy-saving plumbing and flow control products.

Save Water
Reduce waste and help meet sustainability objectives with water-saving solutions.
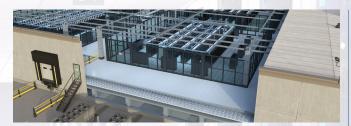

Single Source
Consolidate your vendor list. Watts is your one-stop for high-quality, in-stock products, local expert support, and reliable delivery to keep your project on track.

Take Your Data Center to the Next Level

Enhance your data center with our full line of plumbing and flow control products and unique solutions that meet your needs.

Plumbing & Flow Control Needs for Every Aspect of Your Building

- Domestic Water
- Drainage
- Fire Protection
- Parking/Sidewalk
- Public Restroom
- Remote Monitoring & Flood Protection
- Water Leak Detection

High-Performing Hydronic Cooling Products

- Butterfly Valves
- Check Valves
- Strainers
- Suction Diffusers
- Triple-Duty Valves

Unique Solutions to Meet Your Objectives

Wireless Water Leak Detection

SentryPlus Alert™ Flood Protection

Pre-Engineered Valve Stations

RainCycle™ Rainwater Harvesting

OneFlow® Anti-Scale Systems

Reliable Plumbing & Flow Control Solutions
Optimize Your Commercial Building

Domestic Water

Automatic Control Valves

Backflow Preventers

Balancing Valves

Ball Valves

Butterfly Valves

Check Valves

Dielectric Unions

Expansion Tanks

Gate Valves

Mixing Valves

Pressure Reducing Valves

Relief Valves

Strainers

Triple Duty Valves

Vacuum Breakers

Fire Protection

Automatic Control Valves

Backflow Preventers

Gear Operated Ball Valves

Risers

UL/FM Fire Strainers

Drainage

Cleanouts

Floor Drains

Floor Sinks

Roof Drains

Trench Drains

Parking/Sidewalk

HVAC & Snow Melting Controls

Snow Melting Components

Leak Detection

FloodSafe® Water Detector Shutoff

SentryPlus Alert™ Flood Protection

Wireless Water Leak Detection

Public Restroom

Closet & Lavatory Carriers

Floor Drains

Thermostatic Mixing Valves

Achieve Optimal Efficiency

Help provide a safe, comfortable environment for servers and occupants with our full commercial offering.

High-Performing Hydronic Cooling Products
Maximize Data Center Uptime

## Butterfly Valves

Stocked in sizes 2" – 24"

Reliable Flow Control

- Lug-style, ductile iron body
- Standard product comes with stainless steel disc and EPDM seats
- Designed for dead-end service to the full pressure rating of the valve
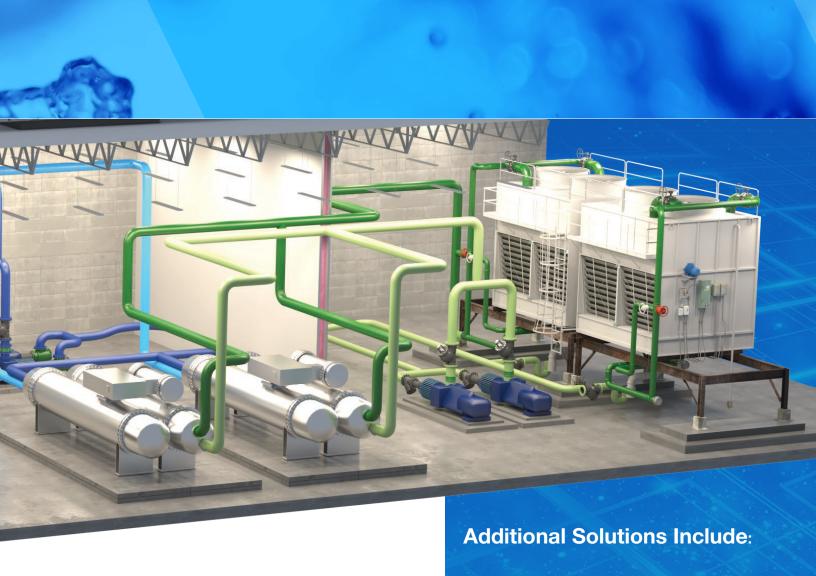

Check Valves

Stocked in sizes 2" – 20"

Flow Reversal Protection

- Lightweight, space-saving wafer design, available up to 24"
- Mating surfaces of the disc and seat are hand lapped for best possible sealing

Y Strainers

Stocked in sizes 1" – 20"

Debris Removal and Equipment Protection

- Rugged, heavy walled castings, available up to 24"

- Breech-lock screens on large sizes (6" and larger) allow for alignment of the screen for easy assembly of cover flange; cover groove allows for proper screen alignment

- All covers feature NPT blow-off outlets (blowdown valves also available)

Additional Solutions Include:

Basket Strainers

Suction Diffusers

Triple-Duty Valves

Welcome to Your Efficient, Reliable Data Center

Optimize uptime, ensure products perform to specification, and keep your project on schedule with Watts solutions for data centers. We offer reliable plumbing and flow control products for mission-critical applications around the world – and support that's there when you need it.

In-stock products and reliable delivery

Local technical support

Solutions that support sustainability objectives

Ready to optimize your data center?

1. Connect with us for a custom consultation

2. We'll review your data center plans, recommend optimizations, and generate your specs and submittal packages

3. Get local support for every stage of your project
