## News Release

### tekmar is Now Compatible with Seven Home Automation Systems.

Vernon, BC. September 30<sup>th</sup>, 2011 – tekmar is pleased to announce that tekmarNet<sup>®</sup> products are now compatible with seven different home automation systems to offer our customers more convenience in controlling indoor climate.

At the touch of a button, temperature adjustments to tekmarNet<sup>®</sup> communicating thermostats can be made using the same interface that controls lighting, security, audio and home theatre. This allows customers to change heating and cooling settings using a keypad, touch screen or mobile software application provided by their home automation system installer.

“Our tN4 Gateway 482 allows tekmarNet<sup>®</sup> thermostats to integrate perfectly with each home automation platform, enabling tekmar’s products to be controlled by a homeowner as easily as their lighting, entertainment and other systems,” said Greg Leupin, tekmar Sales & Marketing Manager.

The tN4 Gateway 482 provides RS 232 serial communication between tekmarNet<sup>®</sup> thermostats and home automation systems. The third party automation system is able to monitor and adjust any of the thermostat’s heating, cooling, and ventilation fan settings.

“tekmar is excited to be working closely with our home automation partners in support of our mutual customers, and we look forward to a long term partnership with them,” Leupin added.

A Control4 software driver is also available from Cinegration - [www.cinegration.com](http://www.cinegration.com)

Home automation companies interested in learning more about partnership opportunities can email: [info@tekmarcontrols.com](mailto:info@tekmarcontrols.com)

#### About tekmar Control Systems

tekmar Control Systems is an integrated engineering & manufacturing company based in Vernon, British Columbia, Canada that provides quality solutions for the heating, ventilation, and air-conditioning (HVAC) industry. Over the past 25 years, tekmar has earned a reputation as the leader in complete control solutions for radiant floor and baseboard heating systems, multi-stage boiler plants, and automatic snow melting systems. A tekmar control system adds value to any home or business through improving the efficiency and durability of the HVAC system without sacrificing the comfort and quality of indoor living, visit: [www.tekmarcontrols.com](http://www.tekmarcontrols.com)
